

1967 Mustang Fastback – Ed Van Laningham

It was on the street next to my car and I saw a 1967 Mustang Fastback. It was in pretty bad shape but it was running and registered. I talked with the owner and he wanted \$1,200 dollars. I offered him \$600 dollars cash and he accepted it. I got the Mustang home and started with my restoration. I had to replace the flooring and both rear fenders. My neighbor (Patrick Burns) helped me. It took many dollars and 18 months to complete the restoration. I bought a crate engine 398 ci and a T10 4 speed transmission. It was quite a job but it was fun and it turned out very well.
